Longlife
PARQUET

MeisterParquet. longlife

Parquet for life!

MeisterParquet. longlife is your floor for life. Quite literally, because it is highly durable and indent-resistant – in other words, made to last! This is made possible by its special structure with a high-quality HDF middle layer (HDF = high-density fibreboard). This is not only technically advantageous, but extremely sustainable too. Although wood is a renewable material, we should still use it sparingly and treat it with care. That's why MeisterParquet. longlife is not a solid wood floor, but consists of three layers with a high-quality real-wood covering layer. This optimises our wood consumption and ensures that you can enjoy your floor for a long time to come. MEISTER longlife warranty included, of course!

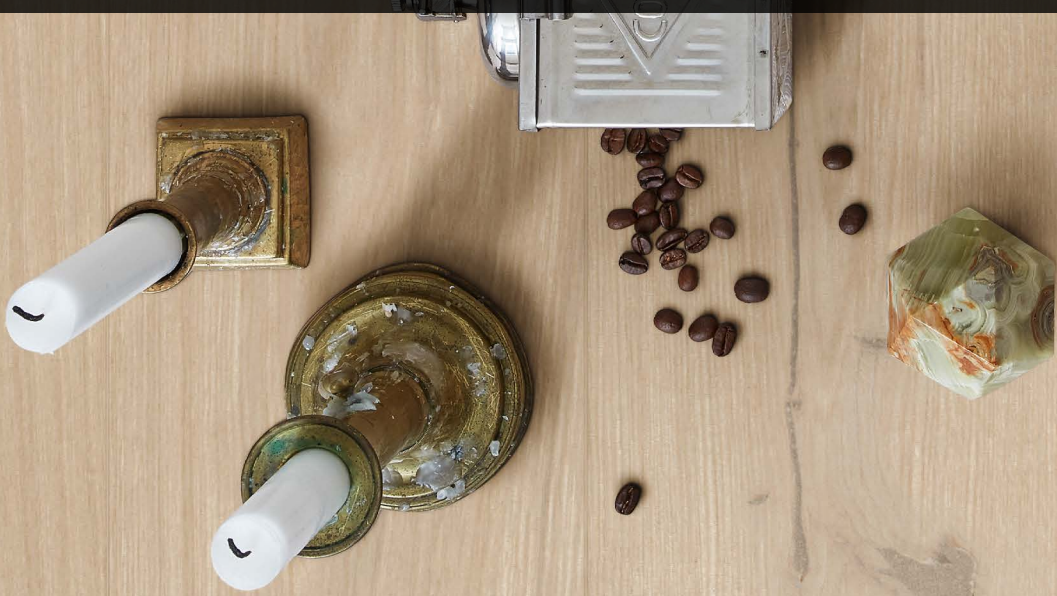

www.blauer-engel.de/uz176
 Except for smoked oak

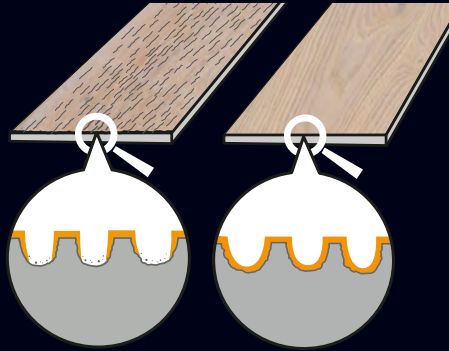

Easy to clean

In the ultra matt lacquered variant, MeisterParquet. longlife has a highly stain-resistant surface with an anti-fingerprint/anti-footprint effect. Frequent vacuum cleaning and, if necessary, damp mopping with an appropriate cleaning product is sufficient for regular maintenance.

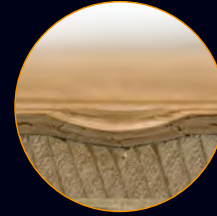

Standard lacquer

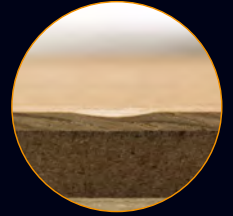

Ultra matt lacquer
Duratec Nature

Indent-resistant

MeisterParquet. longlife is extremely durable and resilient. Thanks to its highly stable HDF middle layer, the press-in behaviour responds much better to mechanical pressure loads than parquet flooring with a standard spruce middle layer.

Standard parquet flooring
with spruce middle layer
(3.6 mm oak covering layer)

MeisterParquet. longlife
with HDF middle layer
(2.5 mm oak covering layer)

Quiet

Greater mass produces less vibrations. By using the HDF middle layer, the net weight of the planks is increased by approx. 50%. The result: fewer vibrations, less room noise – and more quiet.

→ Spruce middle layer
(approx. 540 kg / m³)

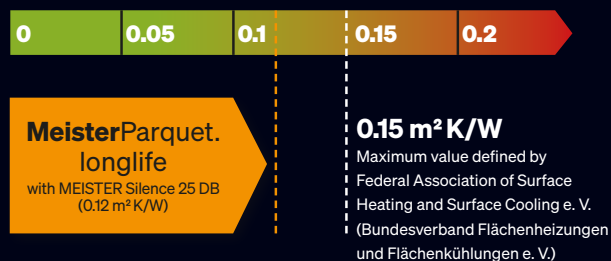

→ approx. 50% higher
net weight
→ HDF middle layer
(approx. 890 kg / m³)

longlife
PARQUET

Energy-saving

In contrast to standard spruce base boards, there are hardly any air pockets in the high-density HDF middle layer that might have a heat-insulating effect. As a result, the heat from the underfloor heating reaches the living space quicker and with less heat loss.

Easy to install

Our innovative locking systems ensure easy installation, a maximum-precision fit and permanent joint locks – even in a floating installation.

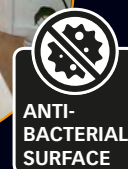

Ecological

Compared with a solid wood floor, the surface of MeisterParquet. longlife uses only a tenth of the amount of the valuable wood material.

Healthy living

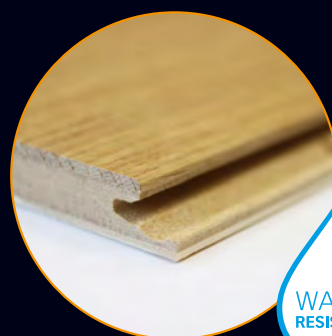

MeisterParquet. longlife is a natural product. It has a moisture-regulating effect and ensures a healthy living climate. The antibacterial surface provides added hygiene!

Water-resistant*

Together with the tightly locking click system, the AquaStop edge impregnation prevents water from penetrating the floor and provides up to four hours of protection against standing water.

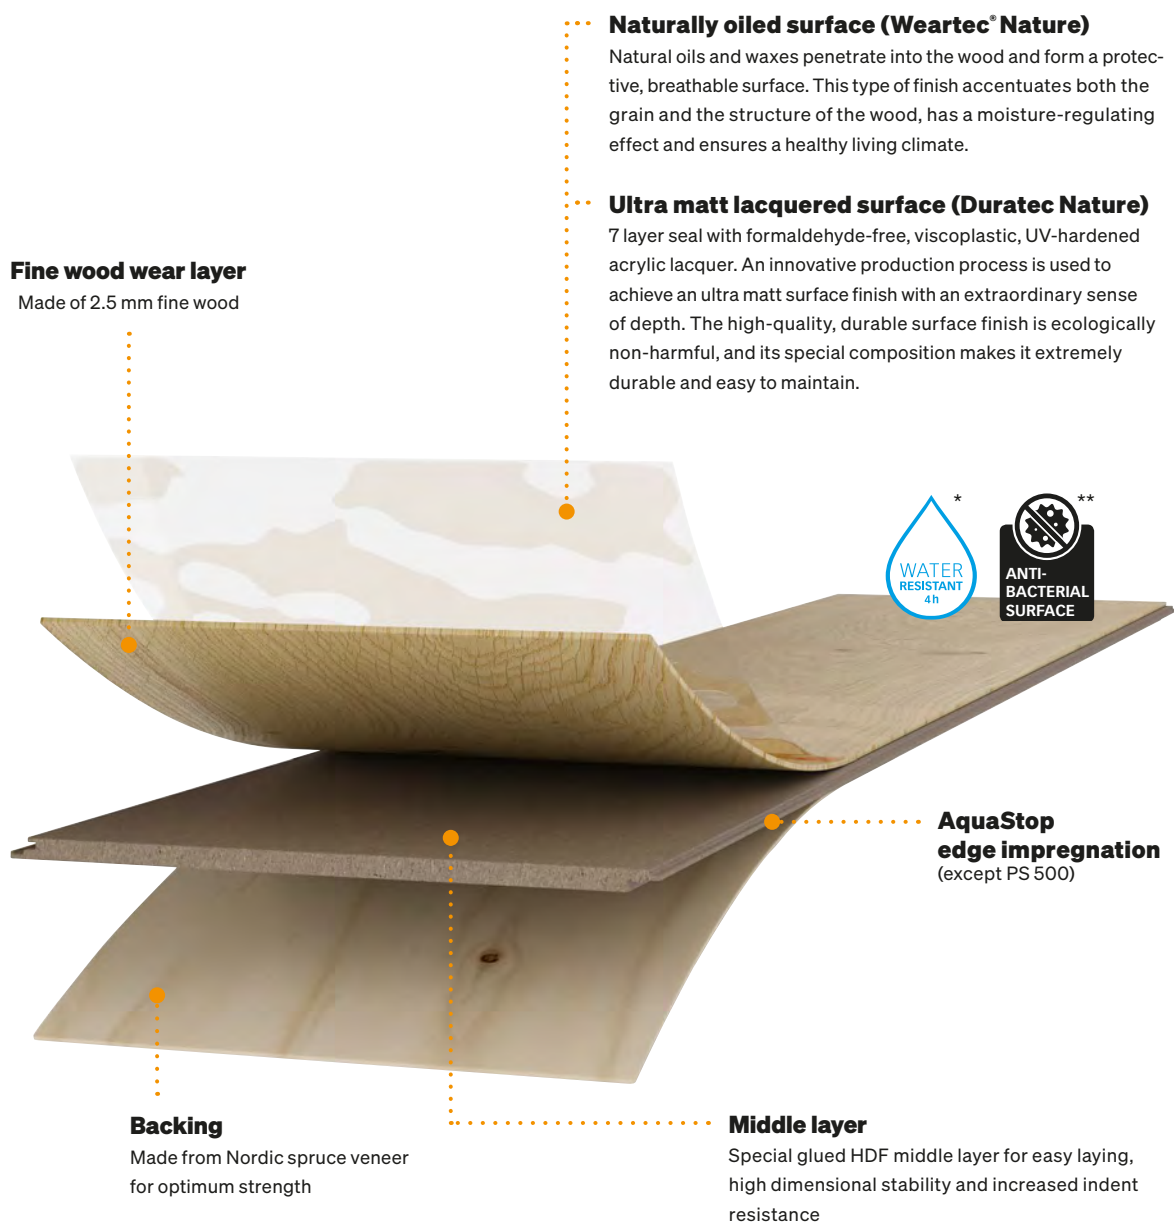

*except PS 500

MeisterParquet. longlife

Two things give MEISTER floors their amazingly long life: their high quality, carefully selected materials and their intelligent multi-layer structure. Together with the dimensionally stable HDF middle layer used by us, this guarantees you a tough floor that remains beautiful over many years. The Weartec® Nature and Duratec Nature surface finishes emphasise the character of the respective woods using high-quality oils, waxes or lacquer and ensure durable, easy-care floors. MeisterParquet. longlife is also suitable for laying on subfloors with controlled hot water underfloor heating.

* Can be laid in humid rooms, such as bathrooms (except PS 500). With naturally oiled surfaces, a first cleaning with a care oil such as Dr. Schutz Premium Care Oil is required. This does not include outdoor areas or wet rooms, such as saunas, shower cubicles, steam rooms or rooms with a floor drain.

** Tested bacteria: Staphylococcus aureus, Escherichia coli

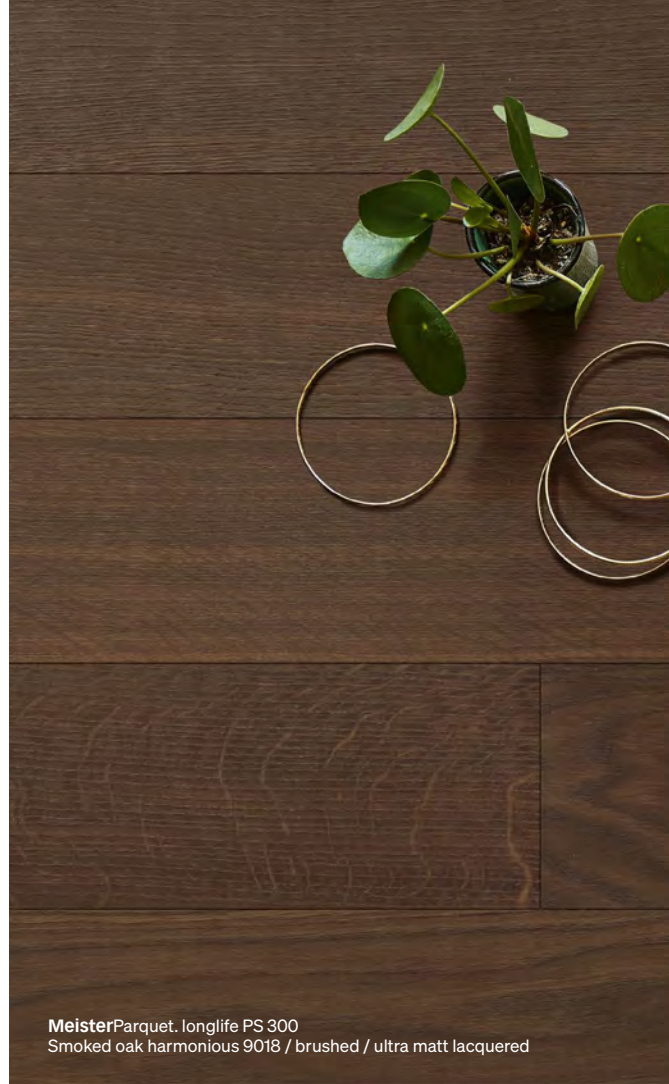

Ultra matt lacquer or natural oil - which one is right for me?

Wood is a natural raw material processed for MeisterParquet. longlife with our special surface finish – a high-quality ultra matt lacquer or a natural oil. Both have their own advantages, which go far beyond visual effects!

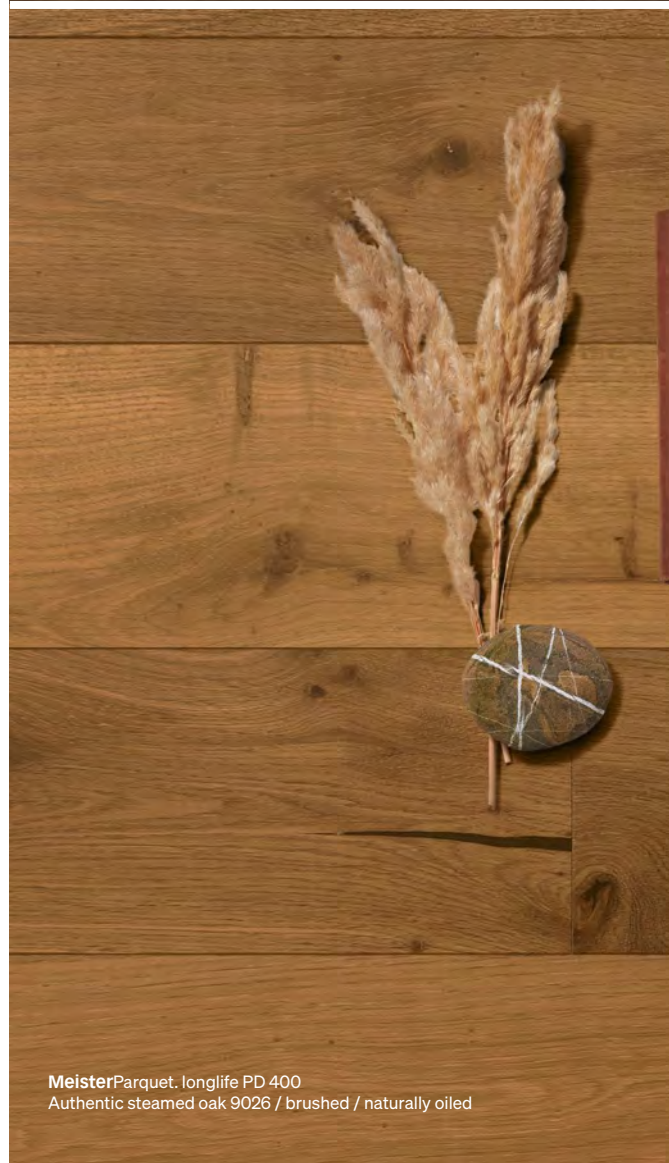

Here's how to keep your flooring beautiful!

Whether it's oiled or ultra matt lacquered, parquet flooring requires care products specially tuned to its properties. This is how you ensure that the flooring stays beautiful for longer and the protective surface film stays in the best condition. You can find all products and tips covering cleaning and care at www.meister.com/en/advice/care.html

MeisterParquet. longlife PS 300
Smoked oak harmonious 9018 / brushed / ultra matt lacquered

MeisterParquet. longlife PD 400
Authentic steamed oak 9026 / brushed / naturally oiled

Ultra matt lacquer Duratec Nature

The ultra matt lacquer "Duratec Nature" penetrates moisture deep into every pore and is thus very low-maintenance and largely resistant to common stains and household chemicals.

- **Ultra matt appearance, looks almost oiled**
- **Particularly stain-resistant**
- **Anti-fingerprint and anti-footprint effect**
- **Highly resistant to micro-scratches and wear**
- **Low-maintenance**

Natural oil Weartec® Nature

Weartec Nature provides the wood with valuable oils and waxes, and forms a protective surface.

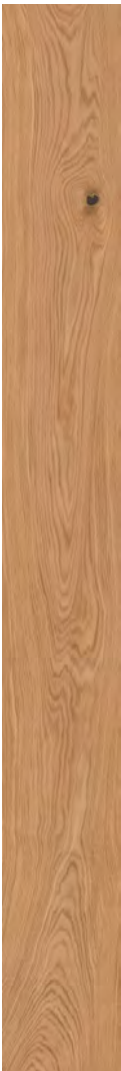

- **Particularly natural look**
- **Breathable and moisture-regulating**
- **Can also be partially re-oiled**
- **In areas subject to heavy use (such as hallways or kitchens) and commercial areas, an initial clean is required after installation**

PLEASE NOTE:

- Regular care
- Re-oiling according to the floor's usage is necessary to preserve its value; generally once a year (and more often in heavily used areas, such as in kitchens)

- Thickness: 13 mm
- Effective measurement: 2400 x 200 mm

Knots, cracks and the like:

How the grading affects the flooring aesthetic

In nature, no one tree is like another – even within one tree, the wood looks very different. Exactly the same applies to parquet: Each individual plank is shaped by structure, the number of knotholes and cracks, and the colours at play in the wood that's being processed. The “grading” describes whether the parquet flooring will appear more calm and elegant, or varied and rustic. MeisterParquet. longlife is available with three different gradings: authentic, lively and harmonious.

Structural differences

Core

Healthy knots

Filled knot

Filled crack

Sapwood

Colour variations

Authentic, lively, harmonious: Our parquet gradings

Authentic

- Colour variations and structural differences between the planks
- Contains heartwood and cracks
- Healthy cracks, not limited in size or quantity
- Isolated sapwood elements (PS 500/PS 300 are sapwood-free)
- Knots and cracks are filled
- Small knots and cracks that cannot be filled may occur

Lively

- Colour variations and structural differences between the planks
- Healthy, tightly intergrown knots
- Heartwood and sapwood (oak planks are sapwood-free)
- Knots are filled
- Small knots and cracks that cannot be filled may occur

Harmonious

- Balanced interplay of colours and structures
- No sapwood, no cracks
- A few small, tightly intergrown knots
- Occasional cracked knots may occur and are filled

MeisterParquet. longlife - for more than just the floor!

Parquet flooring on the wall

One thing is clear: an elegant wood surface lasts longer than any wallpaper and is a quantum leap in exclusive living. Whether it's full-surface wall cladding or a specially accentuated area, as a continuation to the flooring or a separate design statement: wood on walls influences a room's atmosphere, sound and the lighting effect in a unique way.

Where does the floor end and the wall begin? Lines blur when MEISTER takes flooring vertical. How is it done? It's surprisingly easy! A simple system of metal rails and fixing clips ensures that Longlife parquet also cuts a fine figure on the wall. Real life in the third dimension.

You can make your walls more beautiful with all MeisterParquet. longlife collections up to 13 mm thick (except PS 500).

Parquet on the stairs

Formal, elegant and a visual treat. Uniform stair design with original Longlife parquet: Flooring, steps, risers and stair edges made of the same wood. Edge profiles available in L and U versions. The profiles are available in all parquet flooring shades in the MeisterParquet. longlife PD 400 parquet collection (exception: smoked woods). We recommend that the flooring is installed by qualified specialist craftsmen.

For a perfect finish

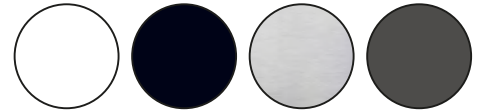

With MEISTER, you can be sure that everything goes together! Underlay materials, skirting boards, profiles and ends – you get everything from one source, Making your flooring into a long-lasting integrated furnishing solution that suits you perfectly.

Skirting board 13 PK profile / Plain white gloss 324 (decorative film)

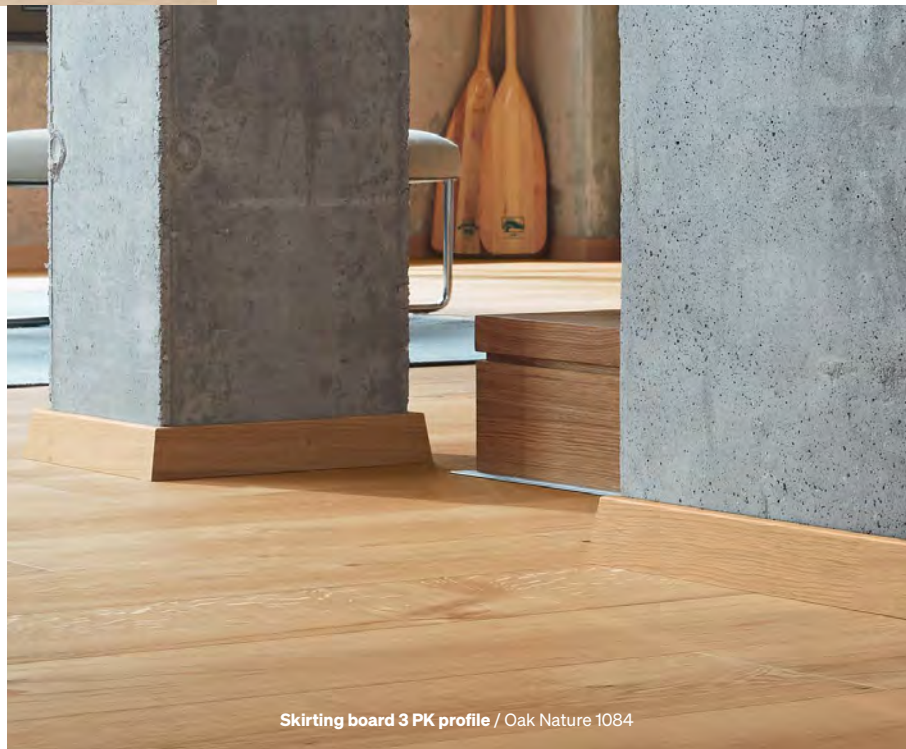

White/plain skirting boards

White skirting boards suit every style and effortlessly complement all other colours. Our mouldings with a white decorative film combine excellently with all floors. Some profiles are also available in the plain colours black, stainless steel and anthracite.

Skirting boards in the same shade

Mouldings in the same shade or decor achieve pure harmony between the floor and skirting boards. They match the decor of the respective flooring, visually extending the floor up to the wall.

Skirting board 3 PK profile / Oak Nature 1084

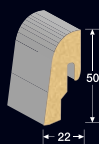

Skirting boards to paint yourself

The same colour as your walls? To match your furniture? Or completely different? It's up to you: design your skirting boards exactly according to your preferences!

The complete system counts: Underlay for high-quality flooring

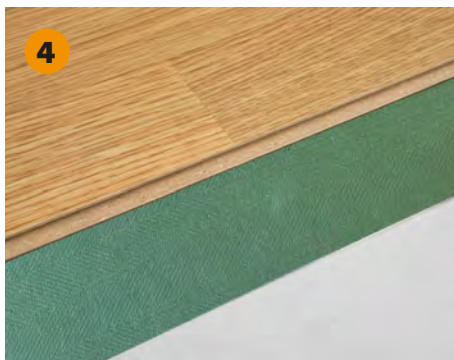

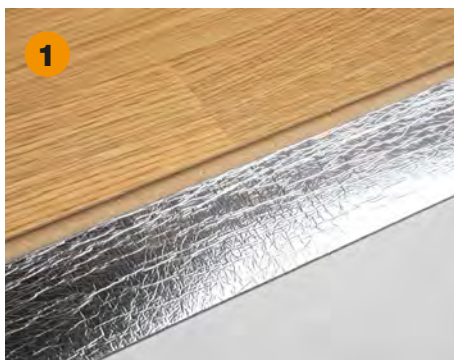

Without a good underlay, it's not a good floor: The underlay material has a significant influence on the durability of the flooring and is an important component of how the entire system functions as far as day-to-day wear is concerned. Premium-quality flooring may suffer damage when laid on poor-quality underlay. High-quality underlay ensures long enjoyment of your flooring – by preventing damage to the click connections with ideal pressure stability, for example. Excessively soft underlay can have a significantly negative effect on fold-down connections. When choosing an underlay material, both the sub-flooring and the flooring to be installed are important. Whether your sub-flooring is concrete, wooden floorboards, prefabricated screed or existing flooring such as tiles or stone: with a comprehensive underlay range, MEISTER ensures that every MEISTER floor can be laid on your sub-flooring.

Underlay/ subfloor	Silence 25 dB	Silence 20	Silence 15 dB	SilenceEco	Twin control	Foam film	Plastic film
Wooden planks	–	✓	–	✓	–	✓	–
Prefabricated screed (e.g. wood-based boards, OSB boards, dry screed boards)	–	✓	–	✓	–	✓	–
Mineral subfloors (e.g. cement screed, anhydride screed)	✓	with plastic (PE) film	✓	with plastic (PE) film	✓	with plastic (PE) film	✓
Mastic asphalt screed	–	✓	–	✓	–	✓	–
Existing coverings (e.g. ceramic tiles and boards, natural stone)	✓	with plastic (PE) film	✓	with plastic (PE) film	✓	with plastic (PE) film	✓
PVC/linoleum in rolls	–	✓	–	✓	–	✓	–

The MEISTER underlay materials:

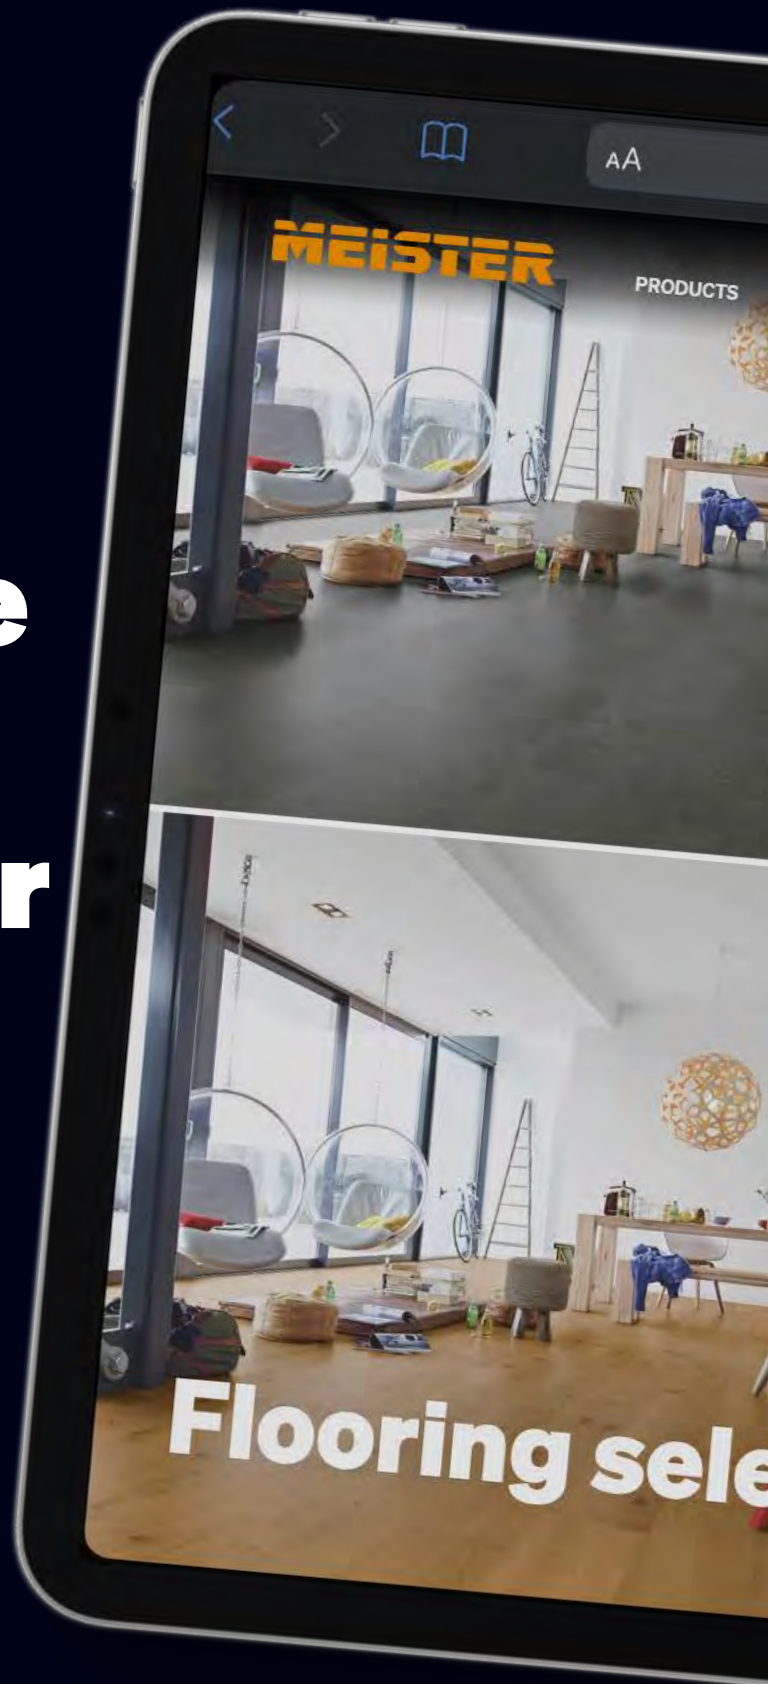

Thanks to the special PUR mineral blend, MEISTER Silence 25 DB, MEISTER-Silence 20 or MEISTER-Silence 15 DB are the ideal insulating underlay for effective room and footfall noise protection. The high net weight of the products also further improves their sound-absorbing properties. In the case of Silence 25 DB and 15 DB the vapour barrier is already integrated, eliminating the need to lay an additional PE film. This is also true for MEISTER Twin Control. The insulating underlay made from closed-cell, moisture-resistant, permanently elastic extruded polyurethane foam also features a practical, integrated self-adhesive strip along its length. With a roll length of 25 m, it is fast and easy to lay and additionally offers excellent footfall noise reduction. Our MEISTER SilenceEco insulating board in the format 59 × 79 cm is highly sustainable, as it is made largely of natural wood fibres – a renewable raw material. At 3 mm thick, it ranks alongside MEISTER Silence 25 DB as one of the thickest underlays in the MEISTER product range. MEISTER foam film is an insulating underlay with a higher density than many other commercially available foam films; in combination with MEISTER PE film, it provides optimum moisture protection.

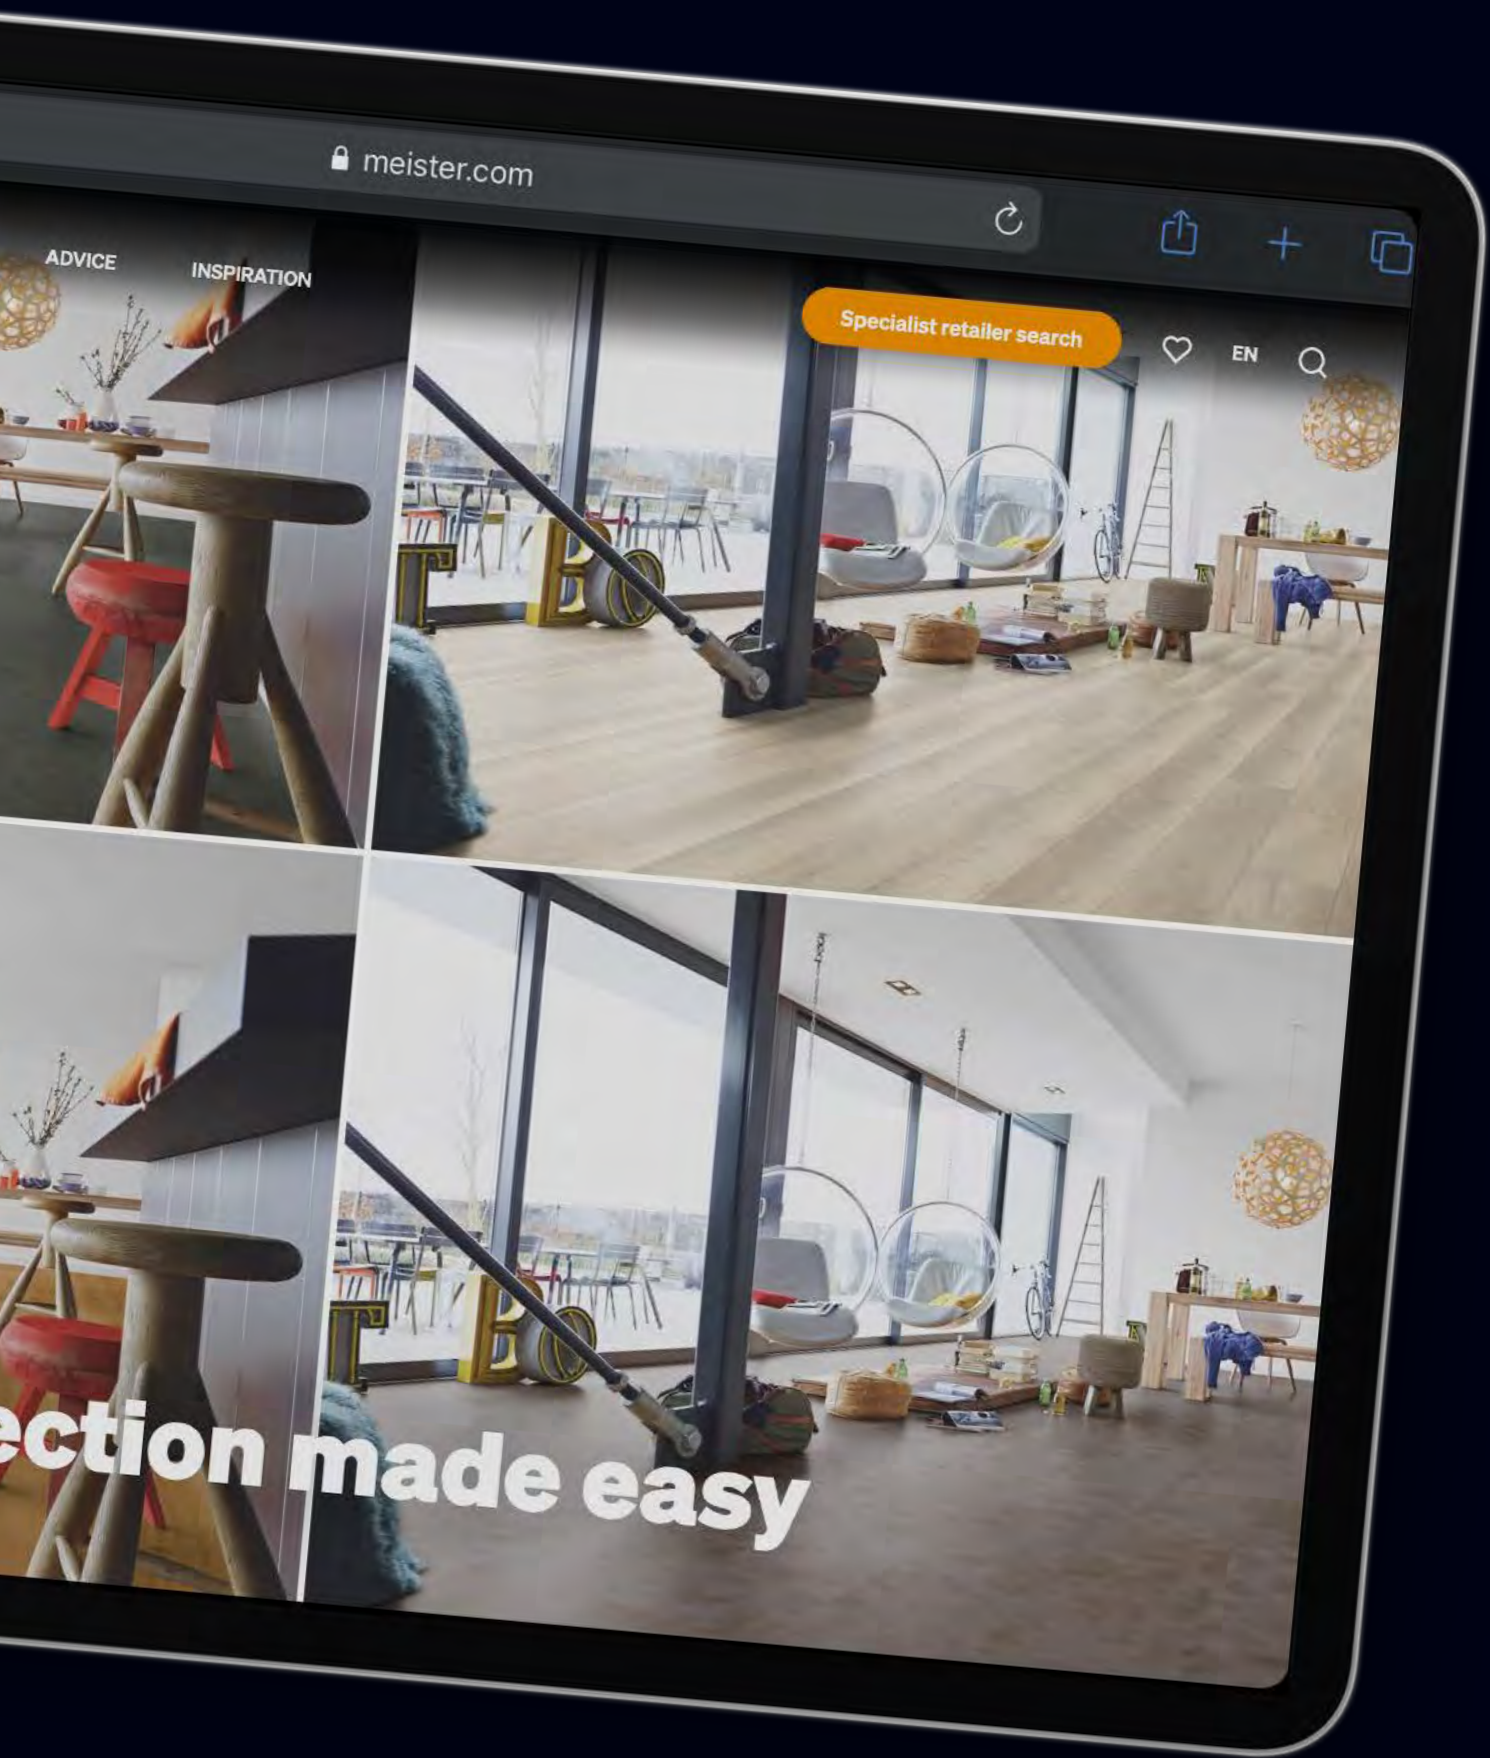

1. MEISTER Silence 25 DB with integrated vapour barrier / 3 mm
2. MEISTER Silence 20 / 2.5 mm
3. MEISTER-Silence 15 DB with integrated vapour barrier / 2 mm
4. MEISTER SilenceEco / 3 mm
5. MEISTER Twin Control with integrated vapour barrier and adhesive strips / 2 mm
6. MEISTER foam film / 2 mm

Selection, installation, maintenance and more: All the online services you need for your parquet flooring

From floor selection and installation to cleaning, value preservation and small repairs, our website www.meister.com and our YouTube channel (youtube.com/MeisterWerkeTV) offer valuable tips and information all about your new parquet flooring!

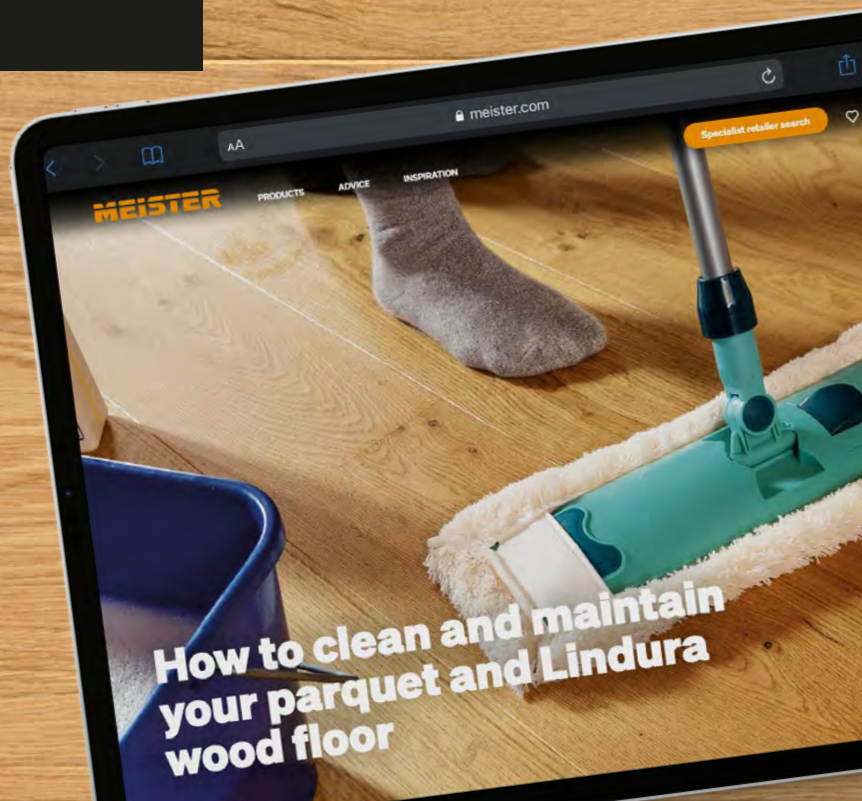

View flooring in your own room

Deciding on a new floor is not always easy. Light? Dark? Which format? Does the floor match the sofa? All these questions can be easily answered using our MEISTER Interior Designer, because with this tool, you can view MEISTER flooring in your own room!

Go to the Interior Designer:
